

Mastering Memory Teacher's Pack: Order Form

USING MASTERING MEMORY

Mastering Memory is designed for use in 1:1 sessions between a teacher, parent, LSA/TA or therapist. The Mastering Memory Manual contains chapters on different memory strategies and transfer and generalisation to real life and we recommend that each teacher using Mastering Memory has a copy. It is important that everyone using the program understands that once skills have been learned in a session they must be practised during the rest of the week as the goal is to improve memory in real life. Memory skills develop with age and it may be appropriate to repeat a series of sessions after a gap of around a year. We do not recommend that students use Mastering Memory on their own without mediation from a teacher or parent.

SINGLE COMPUTER LICENCES

For stand-alone or laptop computers. A stand-alone computer means a desktop or laptop that is not connected to another computer over a network. A Single Computer Licence permits installation on one stand-alone computer or laptop and provides a maximum number of Student Accounts (which are used to store the Student's results) as shown in the order form. A Student Account which is no longer required may be deleted in order to set another one up if the maximum has been reached. The CD must be in the drive for the program to operate. Additional Student Accounts may be purchased if more than the maximum are required.

NETWORK LICENCES

For use over a single network of computers located on a single school site. A Network Licence permits installation of Mastering Memory on more than one computer, but the computers must be part of a network and the Students' results will be stored at a central location on the network which is determined at the time of installing Mastering Memory. This means that a teacher can work with a student at any of the computers in the network and access all of his or her results. The CD does not need to be in any drive for the program to operate.

There is no annual fee for either the Single Computer Licence or Network Licence.
